

Assistant Professor Wang received “The Young Scientist Award” from the 13th International Conference on Intergranular and Interphase Boundaries in Materials (iib2010).

Assistant Prof. Wang received The Young Scientist Award from iib2010. The award has been established to encourage young scientists for their contributions to materials research at the beginning of their careers as well as for their well presented topics.

His presentation in the conference is entitled “Atomic-Scale Structure and Electron Transport of SiC/Ti₃SiC₂ Interface”.

For more information: <http://jecs.org/iib2010/>

Assistant Prof. Wang and Assistant Prof. Nouchi received “The 2nd WPI-AIMR Award” on November 8.

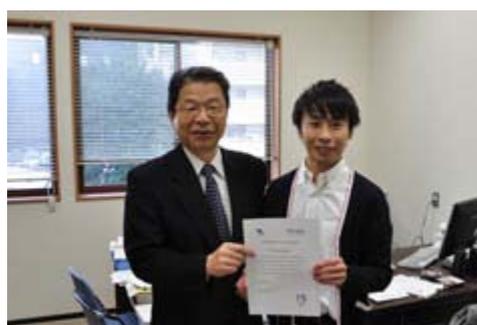

WPI-AIMR Award is given to the researchers working in WPI-AIMR at Sendai excluding PIs when they won the prize from external organizations, and Institute Director evaluates their work is worth awarding.

Award information of Dr. Nouchi:
