

FY2025 AIMR Orientation

Number of sessions held: **10**
Total number of participants: **63**

From FY2025, the orientation has been conducted monthly, scheduled at the most appropriate timing in accordance with each new member's arrival. Individual sessions were also arranged for two JRC researchers during their visits to Japan. In particular, the Director of the Research Support Division personally delivered an overview of AIMR, while the Strategic Public Relations Office outlined how it supports and promotes researchers in sharing their work with the world. The International Affairs Center provided information on the research support framework and daily life in Japan. The small-group format enabled more personalized guidance. The sessions were followed by a "Friday Tea Time," providing opportunities for informal interaction with existing members.
