

"New PI, Professor Kazue KURIHARA took function on 1st April"

**PI, Professor
Kazue KURIHARA**

Professor Kazue Kurihara assumed the first female professor and Principal Investigator of WPI-AIMR on April 1, 2010 from Institute of Multidisciplinary Research for Advanced Materials, Tohoku University. She belongs to Interface PhysChem Laboratory of Soft Materials Thrust.

In PI Kurihara group, they have been exploring the research field of surface forces to develop this technique as a unique tool in material science. Their researches concern interactions between biological molecules, polyelectrolytes, confined liquids, as well as novel instrumentation.
