

The paper by Prof. Kawasaki's group, "Ultrafast dynamics of excitons in delafossite CuScO₂ thin films," published in the Applied Physics Letters 96,211904(2010), has been selected for the June issue of the Virtual Journals of Ultrafast Science.

The "Virtual Journals", published by the American Physical Society and the American Institute of Physics, is an edited compilation of links to articles from participating publishers and covers a focused area of frontier research.
