

Dr. Khademhosseini received "the Young Investigator award" from the Tissue Engineering and Regenerative Medicine Society (TERMIS).

Dr. Khademhosseini, Junior PI of Device/System Construction Thrust, received "the Young Investigator award" from the TERMIS. The 2010 TERMIS-NA Conference will be held from December 5-8 in Orlando, Florida at the Hilton in the Walt Disney World Resort, where Dr. Khademhosseini will be featured at a plenary talk there and the awarding ceremony will be held.

Young Investigator Award:

The Young Investigator Award will be presented to an individual who has demonstrated outstanding achievements within the tissue engineering and regenerative medicine field. The individual will be selected based on a publication or a collection of manuscripts focused within a particular area of research. Candidates for the award must be within 10 years of receipt of their terminal degree and must not be tenured at the time of the nomination (if working within academia).
